

About United Cooperative ...

United Cooperative offers a full line of full performance and high quality calf-raising products.

Our dairy and livestock specialist team is trained in calf management. We're ready to work with you in choosing the best combination of management and feeding programs that result in high performance, profitable calf raising.

Formed in 1936, United Cooperative is a full-service cooperative offering feed, grain, agronomy, and energy products to south-central Wisconsin farmers and consumers.

Make the **COW NOW**

Feed ★ Grain ★ Agronomy ★ Energy

Make the COW NOW

Amplifier® Max and Future Cow® 20

- Provides a low cost per pound of gain with first calving at 23 months
- Calves raised on high-growth feeding programs gain weight faster, before and after weaning, delivering more than 35 cents per pound of gain advantage over standard feeding.
- Calves fed on this feeding plan gain an average of 22 pounds more from birth to weaning.

Amplifier® Max also works with ...

Herd Maker 20-20 and UC18 Quality Calf Starter R60

- Herd Maker is made from homogenized lard and edible quality all-milk protein. It's agglomerated for easy mixing and wetability.
- UC 18 contains 18 percent protein, XP Yeast Culture, SelenoSource, Zinpro, and much more.
- Calves fed with UC 18 show improved consistency of growth and overall calf performance, better biological availability to ensure great herd health and performance, and amino acid balance for optimum post-weaning growth.

MaxiCare® Plus and Future Cow® 20

- Offers a level of performance similar to that of higher-cost all-milk protein replacer feeding programs by utilizing Amino Acid Advantage™ and AMPLI-Calf™ technologies
- Unique functional protein blend that is supplemented with a specific amino acid profile that matches a 25 percent all-milk formula
- Functional proteins offer calves benefits beyond nutrition and helps form stronger intestinal barriers

MaxiCare® Plus also works with ...

Cow's Match® and Future Cow® 22

- Age at first calving: 22 months
- Actual 305-day milk production and protein yield is greater for calves on this program. Calves gave nearly 3,000 pounds more at 305 days in milk in the first lactation than with standard-fed calves.
- Average gain from birth to weaning is 34 pounds more

Work with your United Cooperative dairy and livestock specialist to utilize the proper feeding program for your calves.
